## 316 Stainless Steel Mailbox Ladder with Handles | 5-Step SKU: B00355MHD-316

- Made of 316 stainless steel for added corrosion resistance.
- All-in-one mailbox ladder with built-in latch.
- Patent-pending link design allows ladder to be easily deployed from the deck surface or from outside the boat.
- Flush face plate.
- Handles are integrated into the design so they stay hidden while under way, yet deploy easily and seamlessly with the ladder. They deploy on the same mechanism, so they will always deploy as the ladder deploys.
- Integrated grab rails eliminate the need for external mounting brackets or grab rails.
- No electronic components needed, everything is completely un-powered.
- Sealed box available. By default, there are two large openings on the top that can be covered. Water will still be able to get in through the face plate.
